Carbon Rail Technology

Carbon fibre woven into a diagonal twill pattern produce our 3K Carbon fibre rail layer. Unique properties of carbon textile allow stiffness & flexibility in one lightweight material. Carbon mid-rail is in between internal and external rail tape to produce unrivalled tension & rigidity.

Fin Foil

The foil of the race fins is designed to generate maximum lift with minimum drag, which is beneficial to the stability and tracking of the board. It will make you able to transfer every single stroke into maximum speed.

High End Lite Core Construction.

All of our Ultra-Light Carbon Fin are produced by latest technology of Ultra Light Core with carbon molded. The Next Level of technology benefit to the light weight and durability of the fin. It has reduces the weight more then 50% compared to the traditional RTM Fins

Comes With

LOCK SYSTEM
Quick and effortless release of the adjustable handle also during paddling

HEXAGONAL JOINING SYSTEM
Hexagonal connection with perfect fit and non-twist system, specially for 3-part paddles. It gives the feel of a U-cut paddle.

ANTI TWIST SYSTEM
Provides controlled alignment and prevents from twisting between the shaft and the adjustable handle.

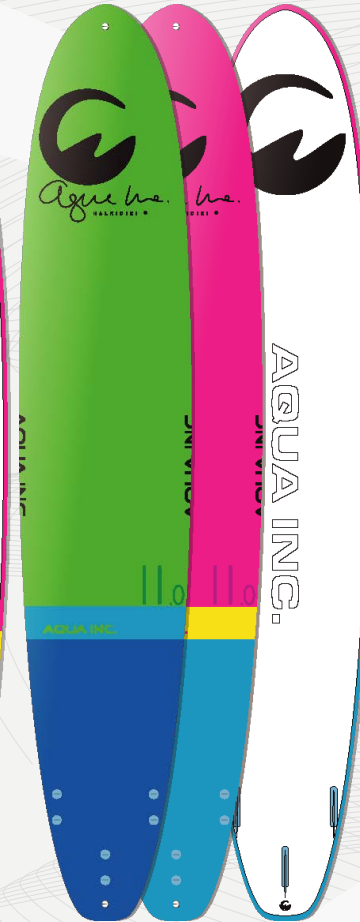

INTEGRATED HANDLE
Light weight one-piece adjustable handle.
